PMS stands for Pantone Matching System. PMS colours are standardised colours listed in the Pantone Formula Guide. Each PMS colour is identified by a number, which printers and makers use to ensure colour is as close as possible to the original.

For a 4 PMS colour envelope, artwork must be supplied containing only one PMS colour (Pantone Black 6 C) and process artwork must be supplied containing separate Cyan, Magenta, Yellow and Black plates. Please note that Pantone Uncoated colours are used for printing.

Please note, our templates are for formats compatible Adobe Photoshop and all Microsoft Word documents do not support PMS colours. If you are supplying artwork for a PMS colour job, DO NOT supply these formats. Our preferred file type is always press ready PDF's.

PANTONE SOLID UNCOATED PALETTE.
